LETTER FROM THE EDITOR

My apologies to all for the very lateness of this issue. I was sick for the first two weeks of the month and it has taken me another week to get it all together. However, despite the lateness of the issue, it is out on time. I haven't had time to send in those

It is Narragansett in the fall for "Falling River". It is a town in Fall River 4 years ago. Fall River, Ma., was a leading textile manufacturer in the country (and home of Lizzie Borden), was named after the Quequechan River which once flowed through its heart.

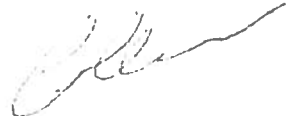

Also, it is the policy of the QMHC that all models are returnable unless previously stated by the seller. Since models are sold unseen, what one person visualizes as good condition and another visualizes as good condition may be two different things. Remember a satisfied customer is a repeat customer.

Another Q.M.H.C. policy is that you do not sell a horse you do not own. Do not accept money for the horse, anticipating its arrival as lots of things could happen so that you don't get the horse to sell. As a policy, the money from a sale should not be spent until you are sure the person is not going to return the model. Otherwise, you don't have the money to return.

I have not heard any complaints, lately, about any of the above, I just wanted to re-emphasize the Q.M.H.C. policy every once in a while.

All the letters received regarding publicity of collecting and showing model horses were printed in last month's issue. However, I think such letters were a good idea. Anybody have anything else they wish to discuss?

Happy springtime and good luck to all those taking final exams over the next few weeks.

SADDLES FOR MODEL HORSES

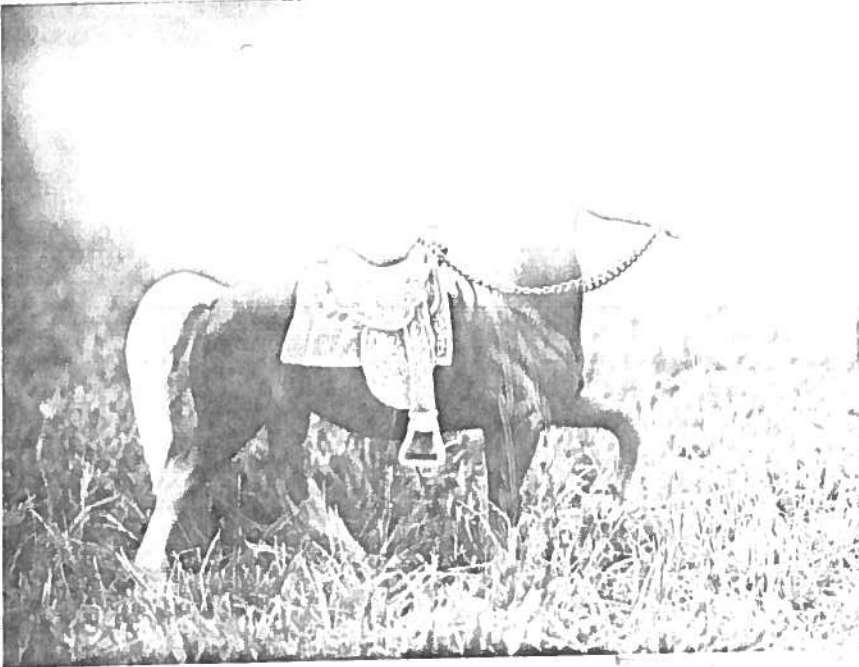

The right equipment on a horse can make or break a good show prospect. Some of the equipment comes with the horses, such as the saddle, reins, bridles etc on the western horses, other equipment is commercially made such as the Breyer western & english saddles while still others are made by the owners.

Below are examples of these types of equipment:

Scientists believe the horse may have evolved in North America and emigrated to the other continents, only to return after thousands or millions of years with the Spanish Conquistadors.

Bentleys has the Montgomery Ward Black Gold (no book) as well as a lot pf S.R. flocked models: Clydesdales, Unicorn, Running Mare & Foal in palomino, Chestnut P.A.S. and others.

(Lani Keller)

The Buckskin Grazing Foal listed in the February, 86 Q.M.H.C. was a typographical error from Horses International. AThere was none made.

(Vicki Stenkamp)

Regarding the Imperial model compared to the Q.H. mare illustrated in the last issue of the Q.M.H.C., Desiree Gill believes that model is more closely compared to the Terrang Model as the head and leg positions are nearly identical.

Horses International was elling a Dapple Gray Hoanoverian for \$12.50 plus postage.

RED ROANS

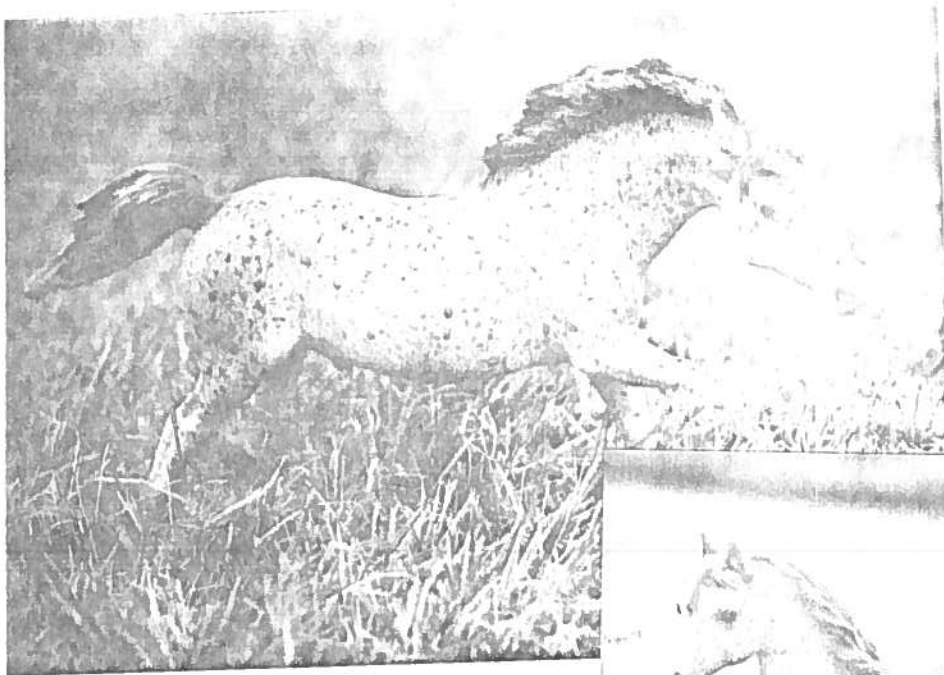

Colleen Brown

Red roan is a mixture of the blood bay salted with white hairs, according to Marguerite Henry's "All About Horses". Strawberry Roan has a sorrel base.

Breyer has made 5 regular issue red roan models plus 1 special run model. They are:

#128	Running Stallion	1968 - 1975
#119	Running Mare	1971 - 1974
#132	Running Foal	actually a special run for Congress 1983
#170	Running Foal	1970 - 1974
		1969 - 1974
		1984 special run for Horses International.

In 1983, for the Model Horse Congress, Breyer made a second Running Mare along with the foal. She is generally a lighter color, matching the foal.
